

WHAT YOU NEED:

- cardstock, brad
- optional: extra cardstock or poster board and cord for hanging

WHAT YOU DO:

- print the document on cardstock or heavier weighted paper
- cut each circle out carefully, leaving no white showing
- if you are wanting to hang your wheel calendar, you can attach as is, cut into a larger circle than the dated blue wheel, or even trim into a triangular shaped hanger. You can also use cardboard or posterboard.
- punch a hole in the center of the wheels using a sharp pencil or small screw driver.
- layer the wheels in the same order you see in the sample above. Hang or use flat once assembled.
